

AH Token (Ticker: AH)

BEP-20 Token on BNB Smart Chain

Official Website: <https://ahmadhassanbutttoken.github.io/ah-token/>

Date: November 2025

Introduction

AH Token is a community-focused BEP-20 token on the BNB Smart Chain. It is designed for secure, fast, and low-fee transactions while enabling decentralized growth and community participation.

Token Overview

- Token Name: AH Token
- Ticker: AH
- Blockchain: BNB Smart Chain (BEP-20)
- Total Supply: 50,000,000,000 AH
- Decimals: 18
- Contract Address: 0xB2596f60cdc1C6c5609C2112B7218F49C6dE82b5

Key Features

1. Community Focused: Encourages active participation and engagement.
2. Fast & Low-Fee Transfers: Leverages BNB Smart Chain for efficient transactions.
3. Secure & Transparent: Token contract verified on BSC Scan.
4. Future Ecosystem: Plans for staking, governance, and community rewards.

Use Cases

- Peer-to-peer transfers
- Community rewards and incentives
- Participation in token governance (future)

Roadmap

Phase 1 (Q4 2025): Token Deployment & GitHub Pages launch

Phase 2 (Q1 2026): Community building & social channels

Phase 3 (Q2 2026): Listing on decentralized exchanges (DEX)

Phase 4 (Q3 2026): Introduce staking & governance mechanisms

Security & Compliance

Smart contract audited for standard BEP-20 security (future formal audit recommended).

Token contract verified publicly on BSC Scan.

No personal or private keys held by third parties.
